

Ready -to-Use Microbial Liquid

# InVade™

bio zap

**Eliminates Organic Odors, Waste  
& Fly Breeding Sites**

## **Directions for Use**

InVade Bio Zap contains natural, non-pathogenic microbes that eliminate organic odors and wastes and eat through scum where flies can breed. Citrus oil provides a fresh scent. Use full strength. Product may be diluted with 1 to 2 parts water for spraying in an ongoing maintenance program. Spray walls, floors, carpets and fabrics where pet, smoke, dead animal or excrement odors originate, just to the point of wetness. Always check a small area for color fastness before use. Rinse garbage receptacles with water and then spray product liberally onto surfaces. Spray gravel or soil surfaces in crawl spaces, concrete in basements or garages and other areas where mold, mildew, sewage, or wildlife have left odors. Spray into cracks, crevices, on floors, in garbage receptacles, bathroom walls, voids and urinals to eliminate organic build-up that can cause odors or harbor fly larvae. Do not apply to food preparation surfaces of food storage areas.

Caution: Keep out of reach of children. May be harmful if swallowed. Seek medical attention and do not induce vomiting. Avoid contact with skin and eyes. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for persistent irritation. Store in a closed, appropriately labeled container between 35 and 90 °F.
