# KILL ANTS & COCKROACHES

AND CREATE A SUSTAINABLE TREATMENT PROGRAM.

Ants, cockroaches, crickets, silverfish, slugs and snails all consume Niban bait. Non-target species, such as birds, mammals, amphibians and reptiles, don't.

The active ingredient in Niban disrupts the metabolic process in the target pests' guts, giving you the control you need. This metabolic disruption is specific to insects and gastropods. On top of that, Niban has no known resistance to target pests.

Niban helps create a sustainable treatment program - and *that* helps you build a sustainable business.
